

Creme Puff Popcorn - 100 days

Grown for home and commercial use. A popular treat for children and also served at parties. The popped kernels are large and fluffy and have a wonderful flavor. Corn prefers a rich, warm, loamy soil. Give frequent but shallow cultivation until tassels appear.

Similar to sweetcorn varieties, Southern States Hybrid Creme Puff Popcorn seeds will grow into medium-high stalks that are dark green and highly productive with 2 ears each. Great for home and commercial farms, this is the perfect movie snack and fan favorite for children as the popped kernels are large and fluffy and have a wonderful flavor! This particular corn variety prefers a rich, warm, loamy soil; give it frequent but shallow cultivation until tassels appear and allow 100 days for full maturation.
