

## Honey Select Sweet Corn - 79 days

Long, elegant 8-inch ears are packed with remarkable crunchy-sweet kernels on this AAS winner. One of an entirely new type of corn called TripleSweet, Honey Select Hybrid combines the crunchy texture of sugary-enhanced types with the extra sweetness and great holding ability of the supersweets! The result? Delicious!

TripleSweet corn actually contains TWO kernel types, selected and reselected to create an ear that is 75% sugary-enhanced and 25% supersweet. Ideal for home gardens, it needs no isolation from other corn, and has great staying power on the stalk.
